SAMUEL LANGENFELD
Junior Web Developer

I am a dog walker turned self-taught web developer. My fluffy friends are sad to see me go, but I crave the excitement of Google and Stack Overflow. I started learning Ruby in October 2016 then moved on to Ruby on Rails. There's nothing better than seeing something you made come to life and turning it loose on the internet where anyone can see and use it. I'm looking for my first developer job in the Washington, D.C. area. My highest goal is to break the internet by accident. Failing that, I'd like to work for a company that values collaborative learning, cool technology, and party games.

Portfolio

Rain Logs
May 2017

A web app that lets construction managers see how much rainfall their sites have had. Built with Rails and uses the Google Maps API and National Weather Service API.

NOVA Book and Wine Club
April 2017 - May 2017

A responsive website for my book club developed with Ruby on Rails. Users can add books to the group bookshelf, schedule meetings, upload pictures, and take notes on what they've read.

Ruby on Rails Tutorial by Michael Hartle
Jan 2017 - Mar 2017

A twitter-like app for Ruby on Rails that I made to learn the basics of Rails. It is a micropost app that allows users to sign up, login/logout, create microposts, and follow other users.

Command Console Chess
Nov 2016 to Dec 2016

A game of chess that is played on the command line between two players or against a simple A.I. who makes random legal moves. Developed in Ruby.
